Mar del Plata, Argentina

PROFILE

Frontend developer with hands-on experience building real-world projects for clients and personal applications. Skilled in React, TypeScript, and JavaScript. I enjoy turning complex needs into clear and functional user experiences through web development. My background in scientific research sharpened my analytical thinking and problem-solving approach, which I bring directly to every project. Looking to join a team where I can keep growing, contribute from day one, and take on new challenges.

TECHNICAL SKILLS

Frontend	React + TypeScript, JavaScript, HTML, CSS
Tools	React Query, Firebase, Vite, Git, Github, Figma, Penpot
Data analysis	Python y R
Languages	Inglés avanzado (escrito y conversacional), Español (nativo)

PROJECTS

Freelance

Landing page for a biotech startup

- Contributed to the design and development of the site.
- thermoreleaf.com.ar

Multipage landing page for a furniture company

- Contributed to the design and development of the site across multiple sections.
- kreat-dpm.com

Personal Projects

Real-time chord and setlist management app (currently in development)

- Built with React + TypeScript + Firebase
- Allows band directors to sync the current song in real time across all connected musicians' screens.
- Songs can be uploaded in .chordpro format directly from the app and stored in Firebase Firestore
- song-manager-2-beta.vercel.app

Video game catalog

- Built with React + React Query as a React practice project.
- Functional replica of the RAWG website, consuming its public API via React Query.
- gamepedia-ten.vercel.app

E-commerce mockup

- Functional online store with a shopping cart, built as a React practice project.
- coffee-queen-mdq.netlify.app

Task management app

- Built with vanilla JS to strengthen core fundamentals.
- gabolope.github.io/javascript-coderhouse

EDUCATION

Doctor in Biological Sciences (PhD) | 2020 - 2026

Universidad Nacional de Mar del Plata

- Research in advanced molecular biology for biotechnological applications
- Advanced use of Python and R for statistical analysis and experimental data visualization.
- Soft skills developed: long-term project management, technical communication, autonomy, and problem-solving.

Bachelor's Degree in Biology | 2014 - 2019

Universidad Nacional de Mar del Plata

Frontend Development

Courses, hands-on projects, and self-directed learning

- HTML, CSS, JavaScript, React, React + TypeScript.
- CoderHouse - React Course.
- CoderHouse - JavaScript Course.
- CoderHouse - Web Development Course.

CORE COMPETENCIES

- Self-directed learning and quick adaptation to new technologies.
- Analytical thinking and systematic approach to debugging and project architecture.
- Experience managing complex, long-term projects.
- Effective communication, both written and spoken, in Spanish and English.
- Collaborative work in multidisciplinary teams.
